Calculated Measure

1. Order Count- Created a measure that calculates the total number of orders in the Order Details table.
2. Average Profit in Delhi- Created a measure that calculates the average profit for orders placed in Delhi.
3. Year-to-Date (YTD) Sales- Created a measure that calculates total sales accumulated from the beginning of the year up to the current order date.

Data Visualization

1. Sales Target Achievement by Category: Compare actual sales with sales targets by category using a **clustered column chart**.
2. Max Profit Margin by Sub-Category: Analyze the maximum profit margin for each sub-category of products using a **donut chart**.
3. Monthly Sales Trend: Show the trend of monthly sales over time using a **line chart**.
4. Comparison of Profit and Quantity by Sub-Category: Compare the relationship between profit and quantity sold for different sub-categories using a **scatter chart**.

5. Comparison of Total Sales Amount and Target: Created **cards** to succinctly display the total sales amount alongside the sales target for quick comparison and analysis. Also, create a **multi-row card** to display the minimum target for each segment.

6. Sales Performance Matrix: Build a **matrix** view to analyze how actual sales compare to sales targets across different categories and months.

6. Geographic Sales Analysis: Visualize total sales on a map by city to identify regional sales patterns.

7. Sales Distribution by Sub-Category: Represent the sales distribution across different sub-categories using a **treemap**.

8. Order Count Analysis by State: Created a **funnel chart** to visualize the distribution of order counts across different states.
